Creator & Marketing

KOL/MCN · Creator · SEO · Content · Social-first

Delivery

Agile/Scrum · User Story · PRD · UAT · OKR

// Hi, I am

Hoang Xuan Quynh

(Quynh Ken)

> AI Product Builder · Product Manager

Product Manager with **10+ years in digital products** and **4 years owning products**. I build every NetSpace product with **Vibe Design**: turning ideas into working builds with AI (Claude Code, Lovable, v0), then measuring them with real users. I know **creators, KOL/MCNs and marketers** through Kol.gov.vn and KolSafety, and have brought AI into products (NetRace BIB photo search, NetStory e-magazines) and into the workflow of a **28–30 person technology division**.

15,000+	30,000+	3,000+	25
Kol.gov.vn users after launch	AI-processed photos across 3 races	New accounts in 30 days	Products owned

01 WORK EXPERIENCE

NetSpace · Product Manager

02/2025 – Present · Hanoi

Own a portfolio of 25 products end to end, including the shared AI area (NetAgent, NetStory, Crawler Big Data); lead the 28–30 person technology division. Every product designed with Vibe Design; accountable for results with real users.

NetRace netrace.vn

Launched an AI product: AI reads BIB numbers so runners find their own race photos, connecting organisers, photographers and runners on one system with no face scanning; Runner Passport profiles across races, Email/Zalo messaging, online ticketing and Race OS for organisers.

✓ 3 races · 30,000+ photos · 10,000+ runners · 95.6% matched to the right runner · photos within 24 hours

Kol.gov.vn kol.gov.vn

Launched a product for creators: an information portal and database of KOLs, MCNs and influencers with official news, KOL and MCN rankings, social influence scores and profiles; KOL/MCN verification and a flow to receive and handle violation reports.

✓ 15,000+ users after launch

NetCMS & NetStory Media suite

Brought AI into content tools: one CMS in two editions, for newsrooms and businesses, covering editing, workflow-based approval and publishing, with NetStory generating AI e-magazines right inside the CMS.

KolSafety Trust & Safety

Built the content moderation process (scan → alert → action), rule sets and violation thresholds, and an admin portal for the operations team. Scans violating posts and videos on TikTok, YouTube and Facebook for KOL/MCNs and protects brands in ad campaigns.

Thien Viet & Nhadat247 Real estate

Set direction for Thien Viet, an online real estate marketplace connecting buyers, sellers, agents and operations in one transaction flow, alongside the Nhadat247 portal and NetRoom for designing interiors during consultations.

✓ Nhadat247: 3,000+ new accounts in 30 days

TOOLS

Claude · Claude Code · Lovable · v0 · Bolt · Figma · Jira · Notion · Lark · Vercel

LEADERSHIP

- Directly manage a 28–30 person technology division and lead 4 POs
- Coordinate many products running in parallel
- Stakeholder management, cross-functional
- Train the team to use AI in its workflow

HOW I WORK

- Build working versions myself to test hypotheses
- Measure with real users, iterate fast
- Pick the right problem, stop the wrong direction
- Product Design background: UX/UI, Design System

EDUCATION & AWARDS

Arena Multimedia
Multimedia Arts Specialist
2010 – 2012
Valedictorian, Class II

VTC Academy
2012 – 2014

Top 72
Talented interns, VCCorp

Outstanding Employee
WePay 2017

LANGUAGES

Vietnamese
Native

English
Strong reading and writing (PRDs, user stories); worked with clients in Japan and Canada

SIDE PROJECTS

Pet ID Card
Pet-tech product I built and run

02 VIBE DESIGN

Vibe Design for every NetSpace product — Claude Code · Lovable · v0

Every product on page 1 (NetRace, Kol.gov.vn, NetCMS & NetStory, KolSafety, Thien Viet & Nhadat247) was shaped and designed with **Vibe Design**: building working interfaces and prototypes with AI, validating them with users and stakeholders, then locking requirements with developers before the sprint.

✓ Trained the 28–30 person technology division to work this way

NetAgent & shared AI infrastructure — Shared AI

Set direction for the shared AI and infrastructure area serving the whole portfolio: NetAgent (AI assistant), NetSocial (converged newsroom), Crawler Big Data, Matrix chat/call.

03 NETSPACE · LEADERSHIP & OPERATIONS (cont.)

- **Lead the 28–30 person technology division** (4 POs, Dev, Mobile, QA); work with SEO, Media, Marcom, Marketing and MCN teams.
- **Restructured the portfolio** as the market shifted: paused projects that no longer fit and moved resources to products that create value and revenue, while keeping live products stable.
- Set a **success metric for every feature** and quarterly OKRs, measured after release; ran A/B tests to validate hypotheses; coach **4 POs** in Agile/Scrum.
- **Own UAT** and sign off releases before production; benchmark leading platforms to find growth opportunities.
- Trained the team to apply AI; lock requirements with developers using working prototypes (AI-assisted prototyping) before each sprint.

04 PREVIOUS EXPERIENCE

KiotViet · Product Design Lead (KMS), also PO — 11/2022 – 02/2025

- **Led the design team** for Page Builder KMS2: a no-code tool that lets shop owners build their own store website (B2B SaaS).
- **Co-owned the backlog** with the Product Executive: scope, feature priority, user stories and acceptance criteria.

✓ Store website Page Builder: 10,000+ users, hit KPI within 3 months of release

No-code builder · Page Builder · SaaS

Product Designer · Freelance, Remote — 10/2021 – 11/2022

- Designed end-to-end products for clients in Japan and Canada: an HR management system (HRM) and a real estate marketplace.

Funtap · Product Designer — 07/2019 – 10/2021

- **Launched the Weeboo app** in 3 months; researched and designed games and entertainment products for Techlab & Funtap.
- **Weeboo monetization & conversion:** designed Apple/Google IAP purchase flows, coins and VIP plans; helped set plans and pricing and optimise conversion.

✓ Weeboo app: launched in 3 months, 200,000+ users; top stories reached millions of views

Mobile app · IAP · Coins / VIP · Entertainment

VCCorp · Senior Visual Designer — 06/2015 – 07/2019

- Designed for the WePay/SohaPay payment gateway system (fintech).

✓ WePay Outstanding Employee 2017

Fintech · Payment gateway · Visual Design
